

## Panduan Mengaktifkan Google Security App password

Pastikan untuk mengaktifkan pengaturan **Google Security** pada akun Gmail Anda. Caranya, login terlebih dahulu ke akun google lalu masuk ke halaman [Google Account](#), lalu klik **Security**.

Scroll ke bawah sampai Anda menemukan bagian **App password** seperti gambar di bawah ini:

Silahkan Anda klik **App password**. Selanjutnya di bagian **Select app** pilih **Other (Custom name)**.

## ← App passwords

App passwords let you sign in to your Google Account from apps on devices that don't support 2-Step Verification. You'll only need to enter it once so you don't need to remember it. [Learn more](#)

You don't have any app passwords.

Select the app and device you want to generate the app password for.

Select app

Select device ▼

Mail

Calendar

Contacts

YouTube

Other (*Custom name*)

GENERATE

Selanjutnya akan muncul isian nama aplikasi, isi dengan nama **ppdb**. Lalu klik **Generate**.

GENERATE

Anda akan mendapatkan **16 karakter password**.

The screenshot shows a white dialog box titled "Generated app password" on a dark grey background. On the left, there are two input fields: "Email" containing "securesally@gmail.com" and "Password" containing 12 dots. On the right, the text "Your app password for your device" is above a yellow box with a red border containing the 16-character password "mkap iuqi gnjz cyod". Below this, the section "How to use it" provides instructions on where to use the password and cautions against sharing it. A blue "DONE" button is at the bottom right.

**Generated app password**

Your app password for your device

mkap iuqi gnjz cyod

**How to use it**

Go to the settings for your Google Account in the application or device you are trying to set up. Replace your password with the 16-character password shown above. Just like your normal password, this app password grants complete access to your Google Account. You won't need to remember it, so don't write it down or share it with anyone.

[DONE](#)

Password tersebut yang akan kita gunakan untuk konfigurasi mail di bagian password.
